1. (Currently amended) A biodegradable stretched film comprising:
a biodegradable polymer; and
a water soluble polymer, wherein the film is breathable and further wherein the film is porous and wettable and ~~has been~~ is stretched from about 100 to about 500 percent of its an original length to provide a water vapor transmission rate greater than about ~~1500~~ 2500 g/m²/24 hrs and an elongation at break of greater than about 100%.
